Education

DY Patil University Sept 2025 - Aug 2027
M.Tech in Computer Science & Engineering (Artificial Intelligence) ***CGPA: 7.20/10***
Relevant Coursework: Adavanced Machine Learning, Deep Learning, Statistics and Probability, ANLP, Generative AI

DY Patil University Aug 2020 - Aug 2024
B.Tech in Computer Engineering (Data Science) ***CGPA: 7.85/10***
Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, DSA, Machine Learning

Career Summary

Emerging data science analyst skilled in data analytics, statistics, deep learning and machine learning, backed by industry-recognized certifications. Experienced in using SQL, Python, and Excel for data analysis, and in creating dashboards with Power BI and Tableau. Delivered insights by handling complex datasets and completed Deloitte and Tata simulations, ensuring alignment with stakeholder objectives.

Project Work

Disaster Classification & Human Detection July 2026 - Oct 2026

- Analyzed the data to assist visual review of disaster scenes, built a dual-model system using **ResNet-50** for scene classification and **YOLO** for person detection in search-and-rescue images.
- Fine-tuned the detector on **SARD**, used dual-T4 GPU training, and integrated **Grad-CAM** explanations and a five-language **Streamlit** interface.
- Achieved **91.8% mAP@50**, **94.4% precision**, and **83.6% recall** on 570 held-out SARD test images; displayed detected people for human review.
- **Stack:** Python.PyTorch, ResNet-50, YOLO, Grad-CAM, Streamlit, Kaggle Notebook

Indian Cattle Breed Identification Jan 2026 - May 2026

- Addressed the challenge of recognizing visually similar breeds by fine-tuning a **ResNet-50** classifier for **50 cattle-breed classes** using transfer learning.
- Applied mixup and early stopping; added **YOLO** cow-image validation, **Grad-CAM**, uncertainty warnings, and a farmer-friendly interface in **five languages**.
- Recorded **68.20% test accuracy** and **0.6484 macro-F1**; withheld low-confidence breed predictions rather than forcing a label.
- **Stack:** Python, PyTorch, ResNet-50, YOLO, Grad-CAM, Kaggle Notebook, Streamlit

Multilingual Text-to-Speech Translator Jan 2024 - May 2024

- Built a multilingual TTS system using Suno's Bark model to generate natural-sounding speech in **13+ languages** with diverse **male** and **female** voices.
- Enabled emotional and nonverbal audio expressions (e.g., laughter, sighs) to enhance accessibility and user experience across virtual assistants, entertainment, and educational applications through realistic, multilingual speech output.
- **Stack:** Python, Hugging Face Transformers, PyTorch, Torchaudio, Jupyter Notebook

Plant Leaf Disease Prediction Jul 2023 - Nov 2023

- Achieved **99.2%** validation accuracy using a **ResNet-9 CNN** model trained on **70K+ images** across **38 classes**, enhancing precision in diagnosing healthy and diseased plant leaves.
- Enabled early and accurate detection of plant diseases to support farmers in improving crop yield, reducing losses, and minimizing pesticide use through an automated deep learning system.
- **Stack:** Python, PyTorch, NumPy, Pandas, Matplotlib, Torchsummary, Kaggle Notebook

Certifications

- **Deloitte Australia - Data Analytics and Tata - Data Visualisation (Forage) (Job Simulation)**
- **IBM - Data Science Professional Certificate**
- **Google - Data Analytics Professional Certificate**

Skills

Languages: Python, SQL, C, Java, HTML/CSS, JavaScript

Technologies & Tools: BigQuery, Git & Github, AWS, PowerBI, Tableau, Excel, Django, Flask, Github Actions, Docker
